

Third-Party Notification Authorization

With this program, the customer can designate a third party to receive copies of his/her monthly statements and copies of notifications in the event the customer's service is to be disconnected for nonpayment. This program can be especially important to older or disabled customers, or those who travel frequently. The designated third party is not responsible for payment of any of the customer's bills and the customer remains fully responsible for such payments. This Third-Party Notification Authorization will remain effective until the customer notifies Westar Energy, Inc. in writing that he/she wishes to discontinue the authorization.

Westar Energy Customer of Record: _____
